**E**stablished May 21, 2019, **Roadpass Products LLC** has been engaged in designing energy efficient, eco-safe, bolt on products for the transportation industry. Our products are designed for a specific purpose and function. That purpose is peace of mind during inclement winter conditions, and the functioning force or body behind what we do, revolves around science and the latest technology available today.

Our vision is out of a response to the ongoing use of corrosive materials on our roads nationwide. Giving consumers a more efficient and safer solution to free themselves of encapsulating snow and ice by means of an organic liquid deicer, is what we strive toward. We work continuously to change and make life better for all by integrating the latest in sophisticated software with cutting-edge mechanical and liquid technologies.

### CORE COMPETENCIES

- ◆ Our deicer products and equipment are one of life's more satisfying experiences — spray it on and the ice rapidly melts away.
- ◆ Site evaluation and digital surveying service.
- ◆ Cost estimating and analysis.
- ◆ Product and equipment sales.
- ◆ Product training and implementation.

### DIFFERENTIATORS

- ◆ Our products are extremely user-friendly, prevents water from solidifying on surfaces, decreases risk of slipping and falling; and is safe for all pets and animals.
- ◆ Our eco-safe fusion liquid deicer is the ultimate preventative solution for winter weather conditions.
- ◆ We offer efficient and effective scheduling and monitoring system and exemplary customer service that meets and exceeds customer expectations.
